Subject: Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Martin,

RE: Support the Consensus Plan -- FCC WT Docket #02-55

This is yet another outrageous and embarrassing example of how Bush's so-called "Homeland Security" has not addressed the security issues here at home. Emergency response communications is a critical necessity if we are to save lives and protect the public.

I would like to know "how" and "who" allowed private cell phone companies to make use of the same bandwidth that our police, fire and other EMS radios use? Interference, garbled or dropped communications not only inhibits first responders from doing their jobs safely and effectively, but also risks the lives of the public community as well. If first responders can't effectively communicate information amongst themselves and other EMS agencies, both the public and EMS agents are subjected to unnecessary risks and dangers.

More than 300 public safety organizations, local governments, and congressional officials support the Consensus Plan, and so do I. It will eliminate these risks and no additional costs will be incurred by either federal, state or local governments - or by the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking for your help.

Please listen to the voices of "common sense" to help protect public safety. Our neighborhoods, families, public safety professionals... America cannot afford to wait any longer.

Sincerely, Andrew Stout An American Citizen

Sincerely,

Andrew Stout

Commissioner Kevin J. Martin
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Washington, DC 20554

Dear Commissioner Martin,

The need for first responders to be able to communicate in times of crisis has never been greater.

As an American who works every day to protect our communities in a 911 Dispatcher Center, I urge you to support the Consensus Plan before the Federal Communications Commission (FCC) to prevent CMRS interference to public safety communications systems.

The FCC has made a commitment to all first responders to address this critical issue, and as time passes, our risk from this problem continues to grow.

The Consensus Plan is the only proposal before the FCC that addresses this problem head-on, and is the only proposal that has the support of America's leading public safety organizations, including:

- Association of Public Safety Communications Officials
- The International Association of Fire Chiefs
- The International Association of Chiefs of Police
- Major City and County Sheriff's Associations

Together with the private sector members of the Consensus Plan, more than 90 percent of affected licensees in the 800MHz band have agreed that this is the best way to resolve this problem for public safety - TODAY. And the Plan requires no public money.

We cannot afford to wait any longer. I hope I can count on your support.

In retro respect, during 911, there were numerous reports of Firefighters radios not functioning properly, and as a direct result, many of the 343 Firefighters who's lives were lost that day may have had a chance to exit the WTC had they heard the call to evacuate. Some theories say the WTC towers were always a problem, however without looking in to this further with testing the fact remains that the Cellular interference could be a direct result in the death of many of these 343 Hero's.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help. Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer. I am a firefighter/emt. Also tech class KE4TGJ.

Sincerely,

William Cahill

Subject: Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.
